Introduction

I moved to Dublin from Spain, to improve my English and to get involved in the booming IT sector here. After I gained my qualification in Web Development I decided this is the best route of action for me as I'm ambitious to work a city where there is room for growth and professional development. I'm an honest and reliable employee who enjoys working as part of a team yet being a self-starter with my own projects too. I am a very sociable and personable front-end developer with excellent people skills.

Experience

Freelance Web Developer - Present

Since moving to Dublin I have been working in the service industry with a view to improving my English. I am now confident that it is at a level where I can move forward on my career path. Although I have been working in a restaurant I have been proactive in gaining freelance clients to continue with my web development skills. Please see my portfolio www.EricGaona.com for a collection of websites I have created for clients both in Ireland and Spain. These websites have been created using a mixture of Wordpress, HTML, CSS, JavaScript and PHP.

Waiter - Cornucopia Restaurant, Dublin

Oct 2017 - Present

Taking reservations, customer service, front of house food service, dealing with complaints and resolving situations in a friendly and efficient manner. Working in kitchen from assisting chef.

Internship Web Developer, Bobyshuh, Bilbao

March 2017 - May 2017

Creating, modifying, publishing web pages using WordPress.com
Meeting clients to discuss and establish the type of design they want then constructing their website.
Re-evaluating, updating and revising websites for clients.
Database administrator

Operations Supervisor/Inventory, Frutas Grana

Jan 2006 - Dec 2016

Receiving and organizing stock
Assisting customers, providing information on pricing, purchases and products
Creating orders for the produce department and maintain inventories at optimal levels by anticipating customer demand
Merchandising the products on the sales floor and assembling promotional display
Helped customers in making purchasing decisions
Responsible with creating staff roster

Education

Since completing my web development course in 2017 I have continued up skilling by completing some courses on Udemy and watching Youtube 'how to' videos. I'm keen to continuously professionally develop and add to my skillset. I'm currently researching which Java programming

course to take next here in Dublin.
